As usual I print for collectors who may be desirous of judging something of the appearance of a few of the coins before the sale, an edition of fifty copies, with two heliotype plates. They will be forwarded by mail for 35 cents each.

From Mr. Randall's superb collection I might easily have selected the coins to make a dozen fine plates, but owing to the suspension of the Heliotype Company it was for a time uncertain whether or not the plates could be printed in this city.

The thick tinted paper edition of the Catalogue, with the plates, will be ready, neatly priced in red ink, as soon after the sale as practicable, and orders will be filled at one dollar each.

PREFACE.

Mr. J. COLVIN RANDALL of Philadelphia, has long been known to American collectors as a most prominent dealer in coins; carrying at all times a heavy stock, especially of American gold and silver, he has not only supplied collectors directly, but it has been his practice to sell at wholesale to dealers throughout the country, particularly those of Philadelphia who have long depended on his stock to make up any deficiencies in their own. Handling vast quantities of coins, he has for the last twenty-five or thirty years been a most earnest and persistent collector, and has made it a constant practice to reserve the finest and rarest pieces which have fallen into his hands during all this period, until his collection is now unrivalled in those specialties to which he has given particular attention,—notably the gold coins and the larger coinage of silver. The collection now offered for sale is remarkable in these particulars:—

First, for variety. The silver Dollars, Half Dollars and Quarters, and the early gold represent nearly every known die and combination of dies. In this respect the collection is in the first rank, and it may be said “it is first, and there is no second.”

Second, for condition. Mr. Randall, however good a specimen he might possess, was never content if a better one existed until he became its possessor, and as a whole, the collection cannot be surpassed for fineness of quality. Collectors will not fail to notice such examples as the brilliant proof 1795 fillet head dollar, the uncirculated and brilliant 1807 quarter, the 1794 and 1805 half dimes, etc. Briefly, the quality of the silver collection will surprise and please all who have not until now had an opportunity to examine it, and the same remark is no less applicable to the gold.

Third, rarity. It is not the uniform high quality alone that recommends this collection, several specimens of which are in this respect undoubtedly unique, particularly those just mentioned; but others, on the simple ground of rarity, must claim attention. The half dollar of 1853, without arrow points at the sides of the date, not only belongs to a regular United States series, equal in importance and conspicuousness to any other, but it is positively the only representative known, thus outranking in rarity the 1804 dollar, the 1815 and 1822 half eagles, or indeed any other coin whatever of the regular series, and as a collector I value it above any other American coin. Such rarities as the dollars of 1794, 1851, 1852, the half dollars 1796 and 1797, the quarter dollar of 1823, etc., are scattered profusely through the catalogue.

Many of the choice things in the collection, Mr. Randall obtained from private collections in Europe, having made several voyages across the Atlantic for the sole purpose of adding to his stock and his private collection, for which a long and extensive European acquaintance gave him facilities such as are afforded to few Americans abroad.

I have endeavored as accurately as possible to describe the condition of the coins, and trust I have made no glaring mistakes. The dearth of really fine coins in the average collection is apt to give cataloguers the desire to make the most of what they are, to regard them too favorably, and thus to describe them in too glowing terms. The uniform character of the Randall collection is such that the incentive to over description is lacking, and I fear rather that I have failed to do proper justice to the collection.

In compliment to collectors, some cataloguers refrain from the use of the terms *rare* and *scarce*, assuming that any information in that direction is superfluous. Handling coins as I do from morning until night every day of my life, I confess my inability to carry in my mind at all times numerous particulars that I would be glad to remember; not the least of these is the degree of rarity pertaining to the objects, and believing that the collector who usually only makes the investigation of coins a recreation and a relief from study and the cares of business, is aided by such notes, I have always thought proper to make use of them. If they are useless my labor is lost, if they are of assistance so much the better.

Much fault has been found with the use of the word *variety* by American cataloguers, who it is certain, use the word in a sense unknown abroad, to distinguish a difference in dies. I have continued the use of the word in the American sense in this catalogue for the reason that I know no other word or way of conveying the same idea, except by the constant repetition of a circumlocutory phrase.

I close these remarks, already too far extended, by calling attention to the fact that this collection contains no duplicates, that each piece catalogued is a *variety*, and different from all the rest; this refers to the regular series; a few duplicates in insignificant departments,—like Political Tokens, Store Cards, Copperheads, etc., may be observed.

All the usual purchasing agents will be present at the sale, to whom collectors may entrust themselves with entire confidence; at the same time I trust that collectors will attend in person, as a sale is thereby rendered far more interesting, and an opportunity is thus afforded for formal inspection of the coins, and a fair judgment as to their quality and value by the parties most directly interested.

The suggestion is thrown out, that as the sale will open with one of the rarest and most valuable pieces in the cabinet, it will be well for the intending purchasers to be prompt in their attendance.

Very Respectfully,

W. ELLIOT WOODWARD.

CATALOGUE.

SILVER DOLLARS.

IN the collection of American silver coins following there are no duplicates; each piece is distinctly different, and the differences are very briefly noted. Labels will be found in the envelopes accompanying the coins. Many of these labels are amply descriptive. In a private letter Mr. Randall writes me: "The idea of a correct work on types and varieties of United States silver dollars, halves and quarters, originated with me. H. and myself were to publish the work together, but without any consultation whatever with me, he issued for his own benefit what he styles the Type Table Catalogue." To this catalogue I occasionally refer, and if it were more generally in the hands of collectors, should avoid description by making more frequent reference to it.

67. 1 1794 Uncommonly fine for this, the rarest of American dollars with one exception; every portion is not only distinct but bold, the hair a little rubbed on the most prominent parts, the stars are all plain and well struck, though flat as they always are; the rev. is quite as good as the obv., the legend perfect, the eagle bold, the feathers of the breast and feathers of the wings somewhat rubbed, the wreath distinct in every part. See plate. *Argon*
- 350 2 1795 Flowing hair, wide date; rev., wreath with ten berries to the right and nine to the left; almost uncirculated.
- " 3 1795 Flowing hair, wide date, last star at the left distant from LIBERTY; rev. like No. 1, stars to the left much smaller than those to the right; extremely fine and a scarce variety. *t*

113. 12 1795 Fillet head, head to the left of the centre ; brilliant proof. This beautiful dollar, so far as condition is concerned, Mr. Randall declares is unique. I certainly have never seen one approaching it in perfection and beauty. Mr. R. held this piece at \$300. Plate.

In this department of the catalogue, the references by number are to Mr. Randall's manuscript work already referred to. In some of Mr. Haseltine's former catalogues, this work was referred to under the designation of H. & R. The half dollars of 1795 alone, are numbered according to the Type Table Catalogue.

- 12 420 1852 No. 2; Orleans mint; fine, very rare.
- 421 1853 No. 1; without arrows; Orleans mint. I consider this coin the gem of Mr. Randall's whole collection. It belongs to the regular series of United States coins, and is undoubtedly unique. I am well

Heolin bought for \$1.00, all of Baltimore,

aware that other specimens are claimed to exist, but one which has long passed unchallenged is now admitted by the owner to be an alteration. The older collectors will remember that, in 1853, the par of silver surpassed that of gold. Silver was purchased at a premium and exported at a profit. Finding that the country was rapidly being drained of all its silver coin and bullion, the government retaining the old weight for Standard Dollars, reduced the weight of all its minor silver coinage, — the half dollar being made to weigh 192 grains, and all the other coins in proportion. This change was marked by placing an arrow-point at the right and left of the date, and the eagle on the reverse was surrounded by a glory of rays; these peculiarities then appearing for the first time. The dimes and half dimes without the arrows and rays, though scarce, are not of infrequent occurrence. The quarter dollar, though occasionally found, is of excessive rarity. The discovery of the quarter dollar is due to an interesting incident which occurred in this way: A broker was weighing a quantity of silver coins; the weight was found to surpass, by a number of grains, the value of the coins by count. After repeatedly weighing and counting, a critical examination revealed the fact that one of the quarters weighed several grains more than any of the others, and gave to collectors a variety hitherto unknown. Diligent search, carefully continued for many years, has added to the piece first discovered possibly a dozen examples,—I think not more. Reverting to the half dollar; I may say this sample weighs 201 grains, 12 grains more than the alteration originally referred to, and 9 grains more than the coin authorized by the act of 1853. This piece, though it has been circulated for a long time, is still in good condition, and may be fairly described as very fine for a coin so old and rare. In conclusion, I will give \$5.00 to see a coin of the same description answering the test of weight. I will pay \$100.00 for a duplicate of this piece, or I will pay \$250.00 for an uncirculated example of the same.

ALTERED AND BASE COINS.

Mr. Randall formed this curious collection for purposes of comparison and identification.

- 1253 1799 Eagle. This piece seems to be a counterfeit of an early period; it is of gold, largely alloyed with silver, and by actual assay the gold contained in it is found to be worth between five and six dollars. It is of the rude workmanship of the period, a rare curiosity, and I regard it as of more value than a genuine eagle of the same date.

- Altered.*
5.50
- 1254 1794 Dollar. This piece has every appearance of the genuine dollar of the date; it is neither a cast nor an electrotpe, nor has it the greasy feeling of a counterfeit. I suspect it is an impression in copper from the original die, and that it has been silvered. If so, it is one of the finest impressions that I have seen. Mr. Ely's copper dollar of this date brought \$130.00. This is nearly as fine, and ought to command the price of the genuine silver dollar. See Plate.
- 1.25 1255 1839 Dollar; silver plated electrotpe.
- .05 { 1256 1820 Half Dollar; base, countermarked J. T. B.

1262 1834 Half Dollar; base.
1263 1837 Half Dollar; base.
1264 1838 Half Dollar; base.
- .75 1265 1804 Half Dollar; altered from genuine Half of 1805.
- .50 1266 1851 Half Dollar; silver; altered probably from 1854.
- " 1267 1851 Half Dollar; alteration.
- " 1268 1851 Half Dollar; another alteration.

CONFEDERATE COINS.

Of the following pieces twelve were originally struck in Nickel, of which in 1874 only four remained, which were held by the owners of the die at \$20.00 each. Concluding to strike none in Nickel, they determined to strike five hundred in Copper. They first struck seven in Gold, twelve in Silver, and, proceeding with the Copper ones, on the fifty-sixth impression the collar burst, and the dies were badly broken. The prices at which they were sold, were: Gold, \$30.00; Silver, \$15.00; and Copper, \$4.00 each. All these facts are certified to by Mr. Randall and Mr. Haseltine.

WASHINGTON COINS AND MEDALS.

14.10	1392	1791 Washington Cent. Rev. Large spread eagle, usually known as the large eagle Washington Cent. Copper, nearly proof. See Plate.
<i>Reviewed,</i> 85.00	1393	1792 Naked Bust Washington Cent. Bronze proof; of excessive variety. The first cent of this variety known to American collectors was imported by Mr. Davenport in a parcel of English tradesmen's tokens. Many years afterwards I bought the piece and sold it in the McCoy collection to Mr. Lightbody for \$480. I afterwards bought Mr. L's collection, and, at the sale, he again became the owner at \$400. I next obtained two of the coins in a celebrated collection which I have reason to believe originally contained four specimens, including the Bushnell and Hoffman pieces. These pieces Mr. Bushnell said he obtained from a negro, who declared that he found them at a fire in Brooklyn, and it happens that the collection to which I refer passed through a fire in Brooklyn under the precise circumstances detailed by the colored man, the alleged finder; so it appears that about one-half of the visible stock of this rare coin was once the property of a youth who picked them up in England, something more than fifty years ago. See Plate.

THE NATIONAL MEDALS.

- 1462 Bust of Col. A. Loudon Snowden ; 1879 below ; rev., view of the Mint of the U. S. at Philadelphia ; bronze, proof. 50. General Washington received a medal for driving the British out of Boston. Gen. Winfield Scott, better known as Old Fuss and Feathers, received two National Medals ; Gen. Taylor received three ; so far as I remember just now, Gen. Grant remains content with one ; while the gallant Colonel A. Loudon Snowden revels and rejoices in no less than four ; for what act of valor or heroism these were conferred (if conferred), history remains silent. The handsome view of the institution mentioned on the reverse of this fine medal, leads us to suspect that this one at least may refer to the capture of the U. S. Mint. What are the other three for ? still remains an unanswered conundrum ; they may be had like oysters "in every style" at the Colonel's place on Chestnut Street, Philadelphia.
